Ionic/Mobile App Development, Blockchain, Tangle, and Crypto Technologies

CURRENT POSITION

Lampros Labs Front-End Lead Developer

Work as the front-end lead developer and do many different tasks ranging from simple content updates to site refreshes as well as mobile builds, also do content management with several different systems such as HubSpot and Wordpress. As well as different human resources tasks from reviewing resumes', to helping with new hire interviews. On top of that it is also my job to make sure that the front end developers have everything they need and if a problem arise that we can work through it and solve the issue quickly and efficiently.

PAST POSITIONS

Lampros Labs Front-End Developer

Worked as a front-end developer and do many different tasks ranging from simple content updates to site refreshes as well as mobile builds, also do content management with several different systems such as HubSpot and Wordpress. Work with many different systems and code types ranging from simple html5 and also including light PHP and other types of languages as well. Have done some light back-end work as well including cloning and backing up SQL tables as well as executing searches.

PROJECTS AND EXPERIENCE

P&G Internal Web Page and Email Template Mobile Optimization May 2018 - Current

Tasked with rewriting and updating the email template files as well as the pages on the internal P&G security system. This is through the same individual as the other P&G jobs but is entirely separate and budgeted separately as well. Focus on media queries. *Used: html, css, sharepoint*

Brewtopia WebApp, System Design and Mobile App - April 2018 - Current

Large project involving several moving parts, as of this week, client is still getting together loan and funding for what will be a multi-step project including a web app, tablet interface, and mobile app design as well.

SayHullo Mobile App April 2018 - Current

Working on the front end components of SayHullo. The client has created a new type of social networking and the front end has been coded in Ionic3 and will eventually be moved to native code. Also in charge of running a 99Design contest for the client on a few different screens.

Used: html, Ionic Framework, GitHub

Intrinzic Website Redesign March 2018 - April 2018

<http://intrinzicbrands.com/>

Full redesign of the Intrinzic Marketing firm website. Site was migrated to Wordpress, entirely rebuilt structurally and designed with a more clean and open design. Worked with designers at Intrinzic and implemented their designs. Some backend PHP was used, mostly built in your typical WP Environment.

Used: html, CSS, JS, PHP (Small Implementation)

DPAA Mobile Site Redesign Nov. 2017 - Current

Lead Developer

Lead developer on an entire site redesign for the Dayton Performing Arts Association, first phase was to design an entirely new and more mainstream mobile site for the client until the client is able to integrate the full site redesign. *Used: html, CSS, JS, PHP (Involving some back-end work), Wordpress*

P&G Internal Web-pages Nov. 2017 - Current

Lead Developer

Creation of monthly email, landing page and updates to carousel as well as navigation page. Each email and landing page were created monthly using content provided by P&G through Intrinzic.

Used: html, CSS, Sharepoint

The Dermatology Group Jan. 2018

Lead Developer

<https://thedermatologygroupcincy.com/>

Client requested removal of a doctor on both the full page as well as the mobile site. A few simple changes were made as well. *Used: html, Wordpress*

PatientBond Updates Nov. 2017

Lead Developer

<https://www.patientbond.com/>

Client wanted several different updates done, as well as a new contact page, landing page and module. Some custom html and CSS were needed to accomplish the client's request as well. *Used: html, CSS, HubSpot CMS, Squarespace (host)*

SSL Upgrades Over Multiple Sites Oct. 2017 - Dec. 2017

Developer

Along with a project manager, multiple sites were transferred to various CMS's including Wordpress, Hubspot and others, including DNS transfers, database transfers and replacement of all URL's to https instead of http. Installation of SSL certificates as well were done. *Used: MySQL, PHP (Force redirects), Wordpress*

Stough Group Oct. 2017 - Dec. 2017

Lead Developer

<https://www.stoughgroup.com/>

Multiple updates and content changes over the course of a few weeks and months. Changes included updates to the carousel slider, individual pages for new development sites, as well as the addition of google maps and previews. *Used: html, CSS, wordpress*

YardParty Promotional Pages Dec. 2017

Lead Developer

<https://myyardparty.com/>

The client wanted two separate pages made for a promotional campaign for their products. They were to be used for facebook ad campaigns. The files were received in raw html and CSS and were then edited to work with Shopify. *Used: html, CSS, Shopify*

Kentucky Colonels Travel Team

January 2018 - April 2018

Lead Developer (Freelance)

<https://nkystorm.com/>

Very clean and simple responsive design using a JavaScript to have the user navigate instead of the normal click and redirect to a new html page. The client was very adamant about having it be simple but effective, it is responsive as well as being user friendly. Responsibilities were to create content to best show what the team can do. *Used: JavaScript, HTML, CSS, Bootstrap Integration*

Kicks 4 Cancer Promotional Page Dec. 2017 - Jan. 2018

Lead Developer (Freelance)

<https://web.archive.org/web/20180206183147/https://kicks4cancer.live>

A client contacted me and asked me to make them a promotional page for a fundraiser they were putting on for children with cancer through a karate school. They needed a simple landing page that offered a bit more than just a goFundMe page would give. It was built using bootstrap 4 as well as some custom media queries for responsiveness. It was built in Visual Studio, is hosted on Dreamhost and entirely hand coded. *Used: VSCode, html, bootstrap, css*

Lovesome Stables Equitherapy May 2017

Lead Developer (Freelance)

This is a relatively straight forward information site. It has multiple pages full of various information, as well as downloadable documents and media. Responsibilities were to take the old site, give it a face lift, and also bring it into 2017 by making it responsive and mobile friendly as well as using PHP files with HTML that will allow the site to load faster server side for better optimization especially since there are so many images. *Used: PHP Storm, JavaScript, HTML5, CSS, Bootstrap Integration*

SCHOOL EXPERIENCE

Pi Kappa Alpha Fall Rush Flyer 2015

Main Designer

- Tasked with creating my fraternities rush flyer for the fall
- Utilized Photoshop and Illustrator, the process drew inspiration from the past flyers as well as previous designs from various projects
- Flyer was distributed and used to bring in new fraternity members

In Class Mobile App 2014

Lead Developer

Tasked with developing an app that was interactive. The app has several simple screens where you input your information and it compiles your information and gives you the cost of how much you will spend on your trip. It also contains a pie chart to show you what is being spent and where. Responsibilities were to make the app fully functional. The greatest challenge was to have the data be available across all pages. Used: Android Studio, XML, Java
